

ENGINEERING **YOUR** SUCCESS.

### LAC Oil Cooler

- AC drive 230V, 440V 2-8 pole 3 phase option
- Flow rate range up to 500 lpm
- Cooling Capacity 160 kW at 40°C
- Industrial Application

### LDC Oil Cooler

- DC drive 12V & 24V - 3300 rpm
- Flow rate range up to 250 lpm
- Cooling Capacity 50 kW at 40°C
- Compact & light weight for Mobile application

### LHC Oil Cooler

- Hydraulic drive
- Flow rate range up to 500 lpm
- Cooling Capacity 160 kW at 40°C
- Variable Speed
- Heavy duty unit suitable for Industrial & Mobile application

### LOC Oil Cooler

- Off-line Cooling System for Industrial application
- Combination of pump motor assembly
- 3 phase 4 pole drive
- Flow rate 20, 40, 60 & 80 lpm
- Cooling Capacity 0.16 to 1.25 kW/°C
- Filter Option Available

### Design

- Static Pressure 21 bar
- Dynamic Working Pressure:14 bar
- Design inlet temp 120°C
- Optional By-Pass, Stone & Dust Guard, Thermostat
- Combination Cooler option to handle multiple fluids

### Construction

- Aluminum Cooler matrix
- Glass fibre reinforced polypropylene Fan
- Fan housing & Guard in Steel
- Surface - Electrostatically powder-coated
